PROCEEDINGS

OF THE

ROYAL SOCIETY OF EDINBURGH.

SESSION 1872–73.

CONTENTS.

Monday, 2*d December* 1872.

PAGE

Opening Address. Session 1872-73. By Sir Robert Christison, Bart., ... 2

Monday, 16*th December* 1872.

On the Philological Genius and Character of the Neo Hellenic Dialect. By Professor Blackie, ... 31

Laboratory Notes. By Professor Tait. Communicated, in his absence, by Professor G. Forbes—

On the Relation between Thermal, and Electric, Conductivity, ... 32

On Electric Conductivity at a Red Heat, . . 32

On the Thermo-Electric Properties of Pure Iron, . 32

Note on the Rate of Decrease of Electric Conductivity with Increase of Temperature. By D. H. Marshall, M.A., Assistant to the Professor of Natural Philosophy. Communicated by Professor Tait, ... 33

Monday, 6*th January* 1873.

Notices of deceased Fellows. By David Milne Home, LL.D. 34

On a Question of Arrangement and Probabilities. By Professor Tait, ... 37

[*Turn over.*

PAGE

Laboratory Notes. By Professor TAIT. (1.) On the Stiffness of Wires. (2.) Preliminary Sketch of the Thermo-Electric Diagram for Iron, Gold, and Palladium, . 44

On the Muscles which open and close the Mouth, with some Observations on the Active and Passive Condition of Muscles generally. By Dr GAMGEE, . . . 47

Observations and Experiments on the Cerebral Hemispheres and Corpora Striata of Birds By Dr M'KENDRICK. Communicated by Professor TURNER, . . . 47

Monday, 20th January 1873.

Award of Makdougall Brisbane Prize to Professor Allman, 48

Report anent proposed alteration of Laws. 48

On the Physical Constants of Hydrogenium. I. By Mr JAMES DEWAR, ... 49

On the supposed Upheaval of Scotland, in its Central Parts, since the time of the Roman Occupation. By D. MILNE HOME, LL.D, ... 49

Monday, 3d February 1873.

On the Anatomy of a new Species of Polyodon, the *Polyodon Gladius* of Martens, taken from the river Yang-tsze-Kiang, 450 miles above Woosung. Part I., being its *External Characters and Structure.* By P. D. HANDYSIDE, M.D., ... 50

Note on the Thermal Equivalents of the Oxide of Chlorine. By JAMES DEWAR, Esq. 51

On the Resemblances which Microscopic Objects in Dichroite and Amethyst have to some of the lower forms of Organic Life. By J. SCOTT, Tain. Communicated by Professor KELLAND, ... 52

Note on the Zodiacal Light. By GEORGE FORBES, Esq., . 55

Monday, 17th February 1873.

Note on Ångström's Method for the Conductivity of Bars. By Professor TAIT, ... 55

On the Thermal Conductivity of Ice, and a new Method of Determining the Conductivity of Different Substances. By Professor GEORGE FORBES, ... 62

For continuation of Contents, see pp. 3 and 4 of Cover.

PROCEEDINGS

OF

THE ROYAL SOCIETY

OF

EDINBURGH.

VOL. VIII.

NOVEMBER 1872 TO JULY 1875.

EDINBURGH:
PRINTED BY NEILL AND COMPANY.
MDCCCLXXV.

BRITISH MUSEUM

CONTENTS.

Opening Address. Session 1872–73. By Sir Robert Christison, Bart., ... 2

On the Philological Genius and Character of the Neo-Hellenic Dialect By Professor Blackie, ... 31

Laboratory Notes. By Professor Tait. Communicated, in his absence, by Professor G. Forbes—

1. On the Relation between Thermal, and Electric, Conductivity, ... 32
2. On Electric Conductivity at a Red Heat, ... 32
3. On the Thermo-Electric Properties of Pure Iron, . . 32

Note on the Rate of Decrease of Electric Conductivity with Increase of Temperature. By D. H. Marshall, M.A., Assistant to the Professor of Natural Phllosophy. Communicated by Professor Tait, . 33

Notices of deceased Fellows. By David Milne Home, LL.D., . 34

On a Question of Arrangement and Probabilities. By Professor Tait, 37

Laboratory Notes. By Professor Tait—

1. On the Stiffness of Wires, ... 44
2. Preliminary Sketch of the Thermo-Electric Diagram for Iron, Gold, and Palladium, ... 44

On the Muscles which open and close the Mouth, with some Observations on the Active and Passive Condition of Muscles generally. By Dr Gamgee, ... 47

Observations and Experiments on the Cerebral Hemispheres and Corpora Striata of Birds. By Dr M'Kendrick. Communicated by Professor Turner, ... 47

Award of Makdougall Brisbane Prize to Professor Allman, . . 48

Report anent proposed alteration of Laws, ... 48

On the Physical Constants of Hydrogenium. I. By James Dewar, Esq., ... 49

n the supposed Upheaval of Scotland, in its Central Parts, since the time of the Roman Occupation. By D. Milne Home, LL.D., . 49

On the Anatomy of a new Species of Polyodon, the *Polyodon Gladius* of Martens, taken from the river Yang-tsze-Kiang, 450 miles above Woosung. Part I., being its *External Characters and Structure*. By P. D. Handyside, M.D., ... 50

Note on the Thermal Equivalents of the Oxide of Chlorine. By James Dewar, Esq., ... 51

On the Resemblances which Microscopic Objects in Dichroite and Amethyst have to some of the lower forms of Organic Life. By J. Scott, Tain. Communicated by Professor Kelland, . . 52

Note on the Zodiacal Light. By George Forbes, Esq., . . 55

Note on Angström's Method for the Conductivity of Bars. By Professor Tait, ... 55

On the Thermal Conductivity of Ice, and a new Method of Determining the Conductivity of Different Substances. By Professor George Forbes, ... 62

On the Formation of Coal, and on the Changes produced in the Composition of the Strata by the Solvent Action of Water slowly percolating through the Earth's Crust during long periods of Geological Time. By R. W. Thomson, C.E., F.R.S.E., ... 68

Note on Homocheiral and Heterocheiral Similarity. By Sir William Thomson, ... 70

On the Mud Banks of Narrakal and Allippey, two Natural Harbours of Refuge on the Malabar Coast. By George Robertson, Esq., C.E., 70

The Meteorology of the Month of May. By Alexander Buchan, M.A., 79

On Vortex Motion. By Sir William Thomson, ... 80

A Contribution to the Visceral Anatomy of the Greenland Shark (*Læmargus borealis*). By Professor Turner, ... 81

Additional Note on the Strain-Function, &c. By Professor Tait, . 84

Notice of a Singular Property exhibited by the Fluid enclosed in Crystal Cavities. By Edward Sang, Esq., ... 87

On the Germ Theory of Putrefaction and other Fermentative Changes. By Professor Lister, ... 89

Notice of New Fishes from West Africa—

I. *Ophiocephalus obscurus*, Günther, ... 89

II. *Synodontis Robbianus*, nov. spec. mihi. (With a Plate). By John Alexander Smith, M.D., ... 89

On the Electrical Conductivity of Certain Saline Solutions, with a note on their Density. By J. A. Ewing and J. G. MacGregor, B.A. Communicated by Professor Tait, ... 95

On the Effect of Heating one Pole of a Magnet, the other being kept at a Constant Temperature. By D. H. Marshall, Esq., M.A., and C. G. Knott, Esq. Communicated by Professor Tait. (With a Plate), ... 97

On the Physiological Action of Light. No. I. By James Dewar, Esq., and John G. M'Kendrick, M.D., of the University of Edinburgh, ... 100

Notice of two Fossil Trees lately uncovered in Craigleith Quarry, near Edinburgh. By Sir R. Christison, Bart., President R.S.E., . 104
On the Formation of Buds and Roots by the Leaves of the Ipecacuan Plant (*Cephaelis Ipecacuanha*). By Professor Balfour. (With a Woodcut), ... 108
On the Physiological Action of Light. No. II. By James Dewar, Esq., and John G. M'Kendrick, M.D., ... 110
On the Thermal Influence of Forests. By Robert Louis Stevenson, Esq. Communicated by Thomas Stevenson, Esq., . . 114
Observations and Experiments on the Fluid in the Cavities of Calcareous Spar. By Dr James Hunter and Edward Sang, Esq., . 126
On "Tait's Property of the Retina." By George Forbes, Esq., . 130
A Theory of Volcanic Eruptions. By Daniel Vaughan, . . 133
On the Placentation of the Sloths. By Professor Turner, . . 134
On the Anatomy of a new species of Polyodon, the *Polyodon Gladius* of Martens, taken from the river Yang-tsze-Kiang, 450 miles above Woosung. Part II., being its Nervous and Muscular Systems. By P. D. Handyside, M.D., ... 136
On the Placentation of the Seals. By Professor Turner, . . 137
Second Report by the Committee on Boulders appointed by the Society. (With a Plate), ... 137
On the Physiological Action of Light. No. III. By James Dewar, Esq., and John G. M'Kendrick, M.D., ... 179
On the Thermo-Electric Properties of Pure Nickel. By Professor Tait, ... 182
Notice of the Ravages of the *Limnoria terebrans* on Greenheart Timber. By David Stevenson, Esq., Civil Engineer, . . 182
Election of Office-Bearers, ... 207
Laboratory Notes. By Professor Tait—

1. First Approximation to a Thermo-Electric Diagram, . 208
2. On the Flow of Water through Fine Tubes, . . 208

Note on the Transformation of Double and Triple Integrals. By Professor Tait, ... 209
On the Physiological Action of Ozone. By James Dewar, Esq., Lecturer on Chemistry, and John G. M'Kendrick, M.D., Physiological Laboratory, University of Edinburgh, . . . 211
On a Compound formed by the addition of Bromacetic Acid to Sulphide of Methyl, and on some of its Derivatives. By Professor Crum Brown and Dr E. A. Letts, ... 219
Note on the Various Possible Expressions for the Force exerted by an Element of one Linear Conductor on an Element of another. By Professor Tait, ... 220
Address on Ozone, by Professor Andrews, Hon. F.R.S.E., Vice-President of Queen's College, Belfast, ... 229
A new Method of Determining the Material and Thermal Diffusivities of Fluids. By Sir William Thomson, ... 229

Continuants—A New Special Class of Determinants. By Thomas Muir, M.A., Assistant to the Professor of Mathematics in the University of Glasgow, ... 229
Remarks upon the Footprints of the Dinornis in the Sand Rock at Poverty Bay, New Zealand, and upon its recent extinction. By T. H. Cockburn-Hood, F.G.S., ... 236
Supplementary Notice of the Fossil Trees of Craigleith Quarry. By Sir Robert Christison, Bart., Hon. Vice-President, R.S.E., &c., . 241
On a Method of Demonstrating the Relations of the Convolutions of the Brain to the Surface of the Head. By Professor Turner, ... 243
On some Peculiarities in the Embryogeny of *Tropæolum speciosum*, Endl. & Poepp., and *T. peregrinum*, L. By Professor Alexander Dickson, ... 247
Notes on Mr Sang's Communication of 7th April 1873 on a Singular Property possessed by the Fluid enclosed in Crystal Cavities in Iceland Spar—

1. By Professor Tait, ... 247
2. By Professor Swan, ... 248

Preliminary Note on the sense of Rotation and the Function of the Semicircular Canals of the Internal Ear. By Professor A. Crum-Brown, ... 255
Biographical Notice of J. S. Mill. By Professor Fraser, . . 259
Obituary Notice of the Rev. Dr Guthrie. By the Rev. Dr Lindsay Alexander, ... 273
Obituary Notice of Mr R. W. Thomson. By Professor Fleeming Jenkin, ... 278
Obituary Notice of Archibald Smith. By Sir William Thomson, . 282
Obituary Notice of the Very Rev. Dean Ramsay. By the Rev. D. F. Sandford, ... 289
Obituary Notice of Professor Rankine. By Lewis D. B. Gordon, C.E., ... 296
Obituary Notice of Justus Liebig. By Professor Crum-Brown, . 307
Obituary Notice of Gustav Rose. By Professor Crum-Brown, . 312
Obituary Notice of the Rev. Professor Stevenson, D.D. By John Small, M.A., Librarian to the University of Edinburgh, . . 314
Obituary Notice of Auguste De la Rive. By George Forbes, Esq., ... 319
Obituary Notice of Dr J. Lindsay Stewart. By Dr Cleghorn, Stravithy, ... 321
Obituary Notice of John Hunter. By J. T. Bottomly, Esq., University, Glasgow, ... 322
The Kinetic Theory of the Dissipation of Energy. By Sir William Thomson, ... 325
On the Stresses due to Compound Strains. By Professor C. Niven. Communicated by Professor Tait, ... 335

On the Parallel Roads of Glen Roy. By the Rev. Thomas Brown, F.R.S.E., ... 339
Note on the Perception of Musical Sounds. By John G. M'Kendrick, M.D., ... 342
On the Establishment of the Elementary Principles of Quaternions on an Analytical Basis. By G. Plarr, Esq. Communicated by Professor Tait, ... 348
Preliminary Note "On a New Method of obtaining very perfect Vacua." By Professor P. G. Tait and James Dewar, Esq., . 348
Laboratory Notes. By Professor Tait—
1. On Atmospheric Electricity, ... 349
2. On the Thermo-Electric Position of Sodium, . . 350
On the Resistance of the Air to the Motion of Fans. By James C. Fairweather, Esq. Communicated by George Forbes, Esq. (With two Plates), ... 351
On the Curve of Second Sines and its Variations. By Edward Sang, Esq., ... 356
Laboratory Notes. By Professor Tait—
On the Thermo-Electric Positions of Sodium and Potassium, . 362
On a New Form of Mariner's Compass. By Sir William Thomson, . 363
Further Note on Spectra under exceedingly Small Pressures. By Professor Tait and James Dewar, Esq., ... 363
On the After-Glow of Cooling Iron at a Dull-Red Heat. By George Forbes, Esq., ... 363
On a Form of Radiation Diagram. By George Forbes, Esq., . 366
On the Semicircular Canals of the Internal Ear. By Professor Crum-Brown, ... 370
On Last-Place Errors in Vlacq's Table of Logarithms. By Edward Sang, Esq., ... 371
Note on the Submerged Fossil Trees of Granton Quarry. By Sir Robert Christison, Bart., Hon. V.P. R.S.E., . . . 377
Note on Grouse Disease. By Professor Maclagan, . . . 378
Latent Heat of Mercury Vapour. By James Dewar, Esq., . . 380
Notes by James Dewar, Esq.—
1. Problems of Dissociation, ... 380
2. Formation of Allotropic Sulphur, ... 380
3. Heat of Fermentation, ... 380
Further Note on Continuants. By Thomas Muir, M.A., F.R.S.E., Assistant to the Professor of Mathematics in Glasgow University, 380
On the Formation of Allotropic Sulphur. By James Dewar, Esq., . 382
On Some Compounds of Dimethyl-Thetine. By Professor Crum-Brown and Dr E. A. Letts, ... 382
On a New Example of the Opheliidæ (*Linotrypane apogon*) from Shetland. By W. C. M'Intosh, M.D., ... 386
Concluding Remarks by David Milne Home, LL.D., . . . 390

Election of Office-Bearers, ... 416
Presentation of the Keith Prize to Professor Tait, . . . 415
Opening Address on the Stability of Steady Motion. By the President, ... 420
Remarks on the Great Logarithmic and Trigonometrical Tables computed in the Bureau du Cadastre under the direction of M. Prony. By Edward Sang, ... 421
On the Elimination of α, β, γ, from the conditions of integrability of S $\iota\alpha\delta\varrho$, S $\iota\beta\delta\varrho$, S $\iota\gamma\delta\varrho$. By G. Plarr, Esq. Communicated by Professor Tait, ... 436
The Development of the Ova, and the Structure of the Ovary, in Man and other Mammals. By James Foulis, M.D. (Edin.) Communicated by Professor Turner, ... 437
Mathematical Notes. By Professor Tait—
1. On a singular Theorem given by Abel, . . . 440
2. On the Equipotential Surfaces for a Straight Wire, . 443
3. On a Fundamental Principle in Statics, . . . 443

Exhibition and Description by the President of his Tide Calculating Machine, also his Improved Tide-Gauge; he also described certain Capillary Phenomena, with Experiments, ... 445
Biographical Notice of Lord Colonsay. By the Hon. Lord Neaves, . 445
Biographical Notice of Cosmo Innes. By the Hon. Lord Neaves, . 453
Biographical Notice of Francis Deas. By the Hon. Lord Neaves, . 461
Biographical Notice of Adam Black. By the Rev. Dr Lindsay Alexander, ... 467
Biographical Notice of Sheriff Cleghorn. By David Maclagan, Esq., C.A., ... 468
Biographical Notice of Henry Stephens. By Professor Maclagan, . 469
Biographical Notice of Christopher Hansteen. By Alexander Buchan, Esq., ... 473
Biographical Notice of Jacques Adolphe Lambert Quetelet. By Alexander Buchan, Esq., ... 474
Biographical Notice of George Berry. By George Barclay, Esq., . 476
On the Complete Theory of the Stone Arch. By Edward Sang, Esq., ... 479
On the Application of Angström's Method to the Conductivity of Wood. By C. G. Knott and A. Macfarlane. Communicated by Professor Tait, ... 481
Notice of Striated Rock Surfaces on North Berwick Law. By David Stevenson, V.P.R.S.E., Civil Engineer, ... 481
Laboratory Notes. By Professor Tait—
a. Photographic Records of the Sparks from a Holtz Machine, 484
b. Determination of the Surface-Tension of Liquids by the Ripples produced by a Tuning-Fork, . . . 485
c. Capillary Phenomena at the Surface of Separation of two Liquids, ... 485

Obituary Notice of Dr Robert Edward Grant, late Professor of Comparative Anatomy in University College, London. By Dr W. Sharpey, ... 486
An Illustration of the relative Rates of Diffusion of Salts in Solution. By Professor Crum Brown, ... 490
On the Oscillation of a System of Bodies with rotating Portions. By Sir William Thomson, ... 490
Laboratory Notes. By Professor Tait—

a. On the Application of Sir W. Thomson's Dead-Beat Arrangement to Chemical Balances, . . . 490
b. Photographs of Electric Sparks taken in Cold and in Heated Air, ... 491
c. On the Electric Resistance of Iron at High Temperatures, ... 491

Biographical Notice of William Ewing, Esq., F.R.S.E. By Professor William P. Dickson, ... 491
On a Faulty Construction common in Skewed Arches. By Edward Sang, Esq., ... 497
On the mode of Growth and Increase amongst the Corals of the Palæozoic Period. By H. Alleyne Nicholson, M.D., D.Sc., Professor of Biology in the Durham University College of Physical Science, ... 498
Exhibition of Diagrams in Illustration of the Capillary Surfaces of Revolution. By the President, ... 500
Presentation of the Makdougall Brisbane Prize to Professor Lister, . 500
On the Diurnal Oscillations of the Barometer. By Alexander Buchan, M.A., ... 505
The Phenomena of Single and Double Vision, as shown in the Stereoscope. By R. S. Wyld, Esq., ... 505
On the Products of the Oxidation of Dimethyl-Thetine, and its Derivatives. By Professor Crum Brown and Dr E. A. Letts, . . 508
Presentation of the Neill Prize to Charles Wm. Peach, . . 509
On the Physiological Action of Light. Part II. By James Dewar, Esq., and Dr John G. M'Kendrick, ... 513
On the Structure and Systematic Position of *Tristichopterus alatus*, Egerton. By R. H. Traquair, M.D., F.G.S., . . . 513
Note of Temperature Measurements in the Great Geysir of Iceland—August 1874. By Robert Walker, Esq., ... 514
On the Capillary Surface of Revolution. By Sir William Thomson and Mr John Perry, ... 520
On the Oscillation of a System of Bodies with Rotating Portions. Part II.—Vibrations of a Stretched String of Gyrostats (Dynamics of Faraday's Magneto-Optic Discovery), with Experimental Illustrations. By Sir William Thomson, ... 521
On the Theory of the Spinning-Top, with Experimental Illustrations. By Sir William Thomson, ... 521

Laboratory Note—Analysis of Titaniferous Iron Sand from North Berwick. By James Davidson, Esq. Communicated by Professor Crum Brown, ... 523
On some Permian Fishes, hitherto erroneously referred to the Genus *Palæoniscus*. By Dr Traquair, ... 525
Note on the action of Bile Salts on the Animal Economy. By J. Graham Brown, Esq. Communicated by Dr M'Kendrick, . . 525
Preliminary Note on the Anatomy of the Pia Mater. By Dr J. Batty Tuke, ... 534
Note on the Physiological Action of Light. By James Dewar, Esq., and Dr M'Kendrick, ... 534
On the Expiatory and Substitutionary Sacrifices of the Greeks. By Dr Donaldson, ... 535
The Placenta in Ruminants—a Deciduate Placenta. By Professor Turner, ... 537
An Essay towards the General Solution of Numerical Equations of all Degrees. By W. H. Fox Talbot, Esq., Hon. F.R.S.E., . . 544
Note on the Electrical Conductivity of Saline Solutions. By J. G. Macgregor, M.A., B.Sc. Communicated by Professor Tait, . 545
On High Flood Marks on the Banks of the River Tweed and some of its tributaries, and on Drift Deposits in Tweed Valley. By David Milne Home, LL.D., ... 559
Observations on Mr Sang's Remarks relative to the Great Logarithmic Table compiled at the Bureau du Cadastre under the direction of M. Prony. By M. F. Lefort. Communicated by Mr Sang, who has translated the paper from the French, ... 563
Observations relatives aux remarques publiées par M. Edward Sang dans les "Proceedings of the Royal Society of Edinburgh, Session 1874–1875," sur les grandes tables logarithmiques et trigonomètriques calculées au Bureau du Cadastre sous la direction de Prony; par F. Lefort, Inspecteur général des Ponts et Chaussées, Membre Correspondant de l'Académie des Sciences des Naples, . 564
Observation relative to Mr Edward Sang's "Remarks on the Great Logarithmic and Trigonometrical Tables calculated in the Bureau du Cadastre under the direction of Prony," published in the Proceedings of the Royal Society of Edinburgh, Session 1874–1875, by M. F. Lefort, Inspecteur General des Ponts et Chaussées Corresponding Member of the Academy of Sciences of Naples, . . 574
Reply to M. Lefort's Observations. By Edward Sang, . . 581
Note on Electric Resistance of Solutions. By William Durham, Esq., and P. R. Scott Lang, M.A., ... 587
On the Circumscribed, Inscribed, and Escribed Circles of a Spherical Triangle. By C. G. Colson, Esq. Communicated by Professor Tait, ... 589
On some Remarkable Changes, Additions, and Omissions of Letters in Certain Cognate European Words. By the Hon. Lord Neaves, ... 596

De l'interpolation des fonctions irrationnelles en général, et des fonctions logarithmiques en particulier, à l'aide des tables numériques. Par F. Lefort, inspecteur général des Ponts et chaussées, Membre Correspondant de l'Académie des Sciences de Naples, . 602

The Theory of the Causes by which Storms Progress in an Easterly Direction over the British Isles, and why the Barometer does not always indicate real vertical pressure. By Robert Tennent, Esq., . 612

On Electric Images. By Professor Tait, ... 623

Laboratory Notes. By Professor Tait—

a. On the Origin of Atmospheric Electricity, . . . 623

b. Experiments on the Thermal Conductivity of some Dialectrics. By Messrs C. M. Smith and C. G. Knott, . . 623

A Chapter on the Tides. By the Rev. James Pearson, M.A., Vicar of Fleetwood. Communicated by Professor Tait, . . . 627

Farther Researches in very perfect Vacua. By Professors Dewar and Tait, ... 628

On the Electric Resistance of Iron at a High Temperature. By Messrs C. M. Smith, C. G. Knott, and A. Macfarlane. (Plate), . . 629
